Netatmo products now available at Lowe's

New York City, 19th May 2016

Netatmo, a revolutionary smart home company, developing groundbreaking, intuitive and beautifully-designed connected consumer electronics, announces the availability of its products at Lowe's. The Weather Station for Smartphone and Welcome, the indoor security camera with face recognition technology, will be available starting tomorrow in more than 140 Lowe's stores across the US.

Compact, elegantly designed aluminium cylinders made from recycled material, the two modules of the Netatmo Weather Station monitor indoor and outdoor environmental elements, including temperature, humidity, air pressure, indoor air pollution, noise level and rain. The Netatmo Weather Station quantifies personal environment and wirelessly transmits data through Wi-Fi to the Weather Station App.

Netatmo has the largest collaborative Weather Stations network which currently monitors the environment in 175 countries, displayed on the Netatmo Weathermap.

Welcome is an indoor security camera with revolutionary face recognition technology. It sends the names of the people it recognizes directly to the user's smartphone. It also notifies the user when it detects an unknown face. Welcome is a game changer in the industry as it's the most advanced consumer indoor security camera. With its state-of-the-art AI algorithm inspired by the architecture of the human brain, the camera recognises the faces it sees with the highest precision.

Welcome is a smart home security camera with full HD that broadcasts in vivid colours. It has an extensive 130° view angle and an outstanding night vision.

Availability

The Weather Station for Smartphone retails at \$149 and Welcome at \$199.

About Netatmo

Netatmo is a revolutionary smart home company, developing groundbreaking, intuitive and beautifully-designed connected consumer electronics. Truly smart, Netatmo's innovative products provide a seamless experience that helps users create a safer, healthier and more comfortable home.

Netatmo carefully designs the mechanics, electronics and embedded software of all its products to the highest standards. Netatmo also creates the mobile and web applications that fully realise their potential.

Since 2012 Netatmo has released four devices, all of them infused with intelligence and delivering state-of-the-art features:

- The Netatmo Weather Station for Smartphone allows users to keep track of what is happening in their indoor and outdoor environments in more than 170 countries. It is the world's largest collaborative weather station network.
- The Netatmo Thermostat for Smartphone, designed by Philippe Starck, allows users to control their heating remotely from a smartphone. With analysis of their daily routine, the Thermostat for Smartphone allows users to save 37% on energy heat their home.
- Welcome, the indoor security camera with face recognition technology, puts names to the faces it sees. The camera notifies the user exactly who's at home, their loved ones or a stranger.
- Presence, Netatmo's outdoor security camera, detects and reports on people, cars and animals. The camera understands what it sees and lets the user know exactly what is happening outside his home.

Netatmo is a key player in the smart home industry, with products available through various distribution networks worldwide, from both major retailers and BtoB channels.

In November 2015 Netatmo completed a series B funding round of €30 million. The company previously raised €4.5 million in 2013.
