

Netatmo's Personal Weather Station and its accessories integrate with Amazon Alexa to enable voice-controlled climate monitoring

Amazon Alexa enables its users to interact with connected devices via voice control, providing a unique smart home experience

London, UK, 21st February 2017 – Netatmo, a revolutionary smart home company developing groundbreaking, intuitive and beautifully-designed connected consumer electronics, announces today the compatibility of its Personal Weather Station and accessories with Amazon Alexa. This new integration showcases Netatmo's ability to provide an intuitive and customizable Smart Home experience.

Amazon Echo is a hands-free, voice-controlled speaker. It connects to the Alexa voice service - the brain behind Echo - to change the house temperature, play music, provide information and more, instantly. Users just need to say the word “Alexa” and Echo responds immediately.

“Alexa, ask Netatmo what the outside temperature is”

The Personal Weather Station and its accessories offer a complete solution to monitor local climate conditions. It accurately measures household and outdoor environments, including temperature, humidity, air pressure, indoor air pollution, noise level, rain and wind. The Personal Weather Station

measures the users' environment and wirelessly transmits data through Wi-Fi to the Netatmo Weather app. Users have access to all of their data all of the time, via smartphone, tablet or computer.

With Amazon Echo, users can simply ask Alexa for information on any of these conditions, effortlessly and in real time ("Alexa, ask Netatmo what the outside temperature is"). Amazon Echo also integrates with the Weather Station accessories: the Netatmo Rain Gauge, allowing users to monitor rainfall ("Alexa, ask Netatmo how much it has been raining today") and the Netatmo Wind Gauge, measuring wind speed and direction ("Alexa, ask Netatmo how windy is it outside?").

"Our customers can now benefit from the convenience of using Amazon Alexa voice-control to improve their comfort at home", says Fred Potter, Founder and CEO of Netatmo. "Integrating Amazon Alexa demonstrates our ability to provide our customers with the most innovative technologies."

The Netatmo Weather Station is the company's second device to integrate with Amazon Alexa, after Netatmo announced the compatibility of its Smart Thermostat with Amazon's platform in late 2016. The Smart Thermostat allows users to save 37%¹ on energy to heat their home.

Price and availability

The Netatmo Personal Weather Station retails for £139 and is available at xxx, xxx, xxx, as well as Amazon.co.uk and [Netatmo.com](https://www.netatmo.com).

Amazon Echo retails for £ 149.99 and Amazon Echo Dot retails for £49.99. Both are available at www.amazon.co.uk/echo.

About Netatmo

Netatmo is a revolutionary smart home company, developing groundbreaking, intuitive and beautifully-designed connected consumer electronics. Truly smart, Netatmo's innovative products provide a seamless experience that helps users create a safer, healthier and more comfortable home.

Netatmo carefully designs the mechanics, electronics and embedded software of all its products to the highest standards. Netatmo also creates the mobile and web applications that fully realise their potential.

Since 2012 Netatmo has released thirteen devices and accessories, divided into four categories:

- **Weather** - The Personal Weather Station and its accessories, the Additional Module, the Rain Gauge and the Wind Gauge.
- **Energy** - The Smart Thermostat and the Smart Radiator Valves, both designed by Philippe Starck.
- **Security** - The security cameras Welcome, for indoor, and Presence, for outdoor, and their accessories, the Tags and the Indoor Security Siren, and the Smart Smoke Alarm

¹ For homes that have individual heating, survey carried on Netatmo Smart Thermostat users between November 2014 and March 2015, compared to a use without thermostat or with a non-programmable thermostat (heating at constant temperature) on the same period.

- **Air care** - Healthy Home Coach, the smart indoor climate monitor

Netatmo is a leading innovator in the smart home industry with products available through a growing network of distributors worldwide, selling to consumers through major retail and B2B channels.

Through its program “with Netatmo”, Netatmo develops connected solutions with leading brands in the building industry to be integrated into residential home infrastructure, whether new-build or renovation.

In November 2015 Netatmo completed a series B funding round of €30 million. The company previously raised €4.5 million in 2013.
